[For developers](#)

ChatGPT

We've trained a model called ChatGPT which interacts in a conversational way. The dialogue format makes it possible for ChatGPT to answer follow-up questions, admit its mistakes, challenge incorrect premises, and reject inappropriate requests.

Models

GPT-3 models are capable of natural language processing tasks such as text generation, summarization, and analysis.

[Read about GPT-3](#)

[Copywriting](#) [Summarization](#) [Parsing text](#) [Classification](#) [Translation](#)

GPT-3 can generate high-quality text for copywriting tasks, including product descriptions, marketing materials, and headlines.

[Try in Playground](#) ↗

Input

Create promo copy for the FamilyTime mobile application. It allows unlimited uploading, special filters and makes it easy to create albums of photos and videos. It runs on iOS and Android:

Output

FamilyTime is the perfect app to share and create memories with your family.
FamilyTime is a free, unlimited photo and video editor that allows you to create albums of your memories. It has a special filter fo

DALL·E

DALL·E is an AI system that can create realistic images and art from a description in natural language.

Made for developers

Developers can start building with a just simple API call.

[Get started](#)

[Read documentation](#)

```
import openai

openai.Completion.create(
  engine="davinci",
  prompt="Make a list of astronomical observatories:"
)
```

Chat

Developers can use GPT-3 to build interactive chatbots and virtual assistants that can carry out conversations in a natural and engaging manner.

Embeddings

Analysis

Developers can use GPT-3 to summarize, synthesize, and answer questions about large

Developers can fine-tune GPT-3 on a specific task or domain, by training it on custom data, to improve its performance.

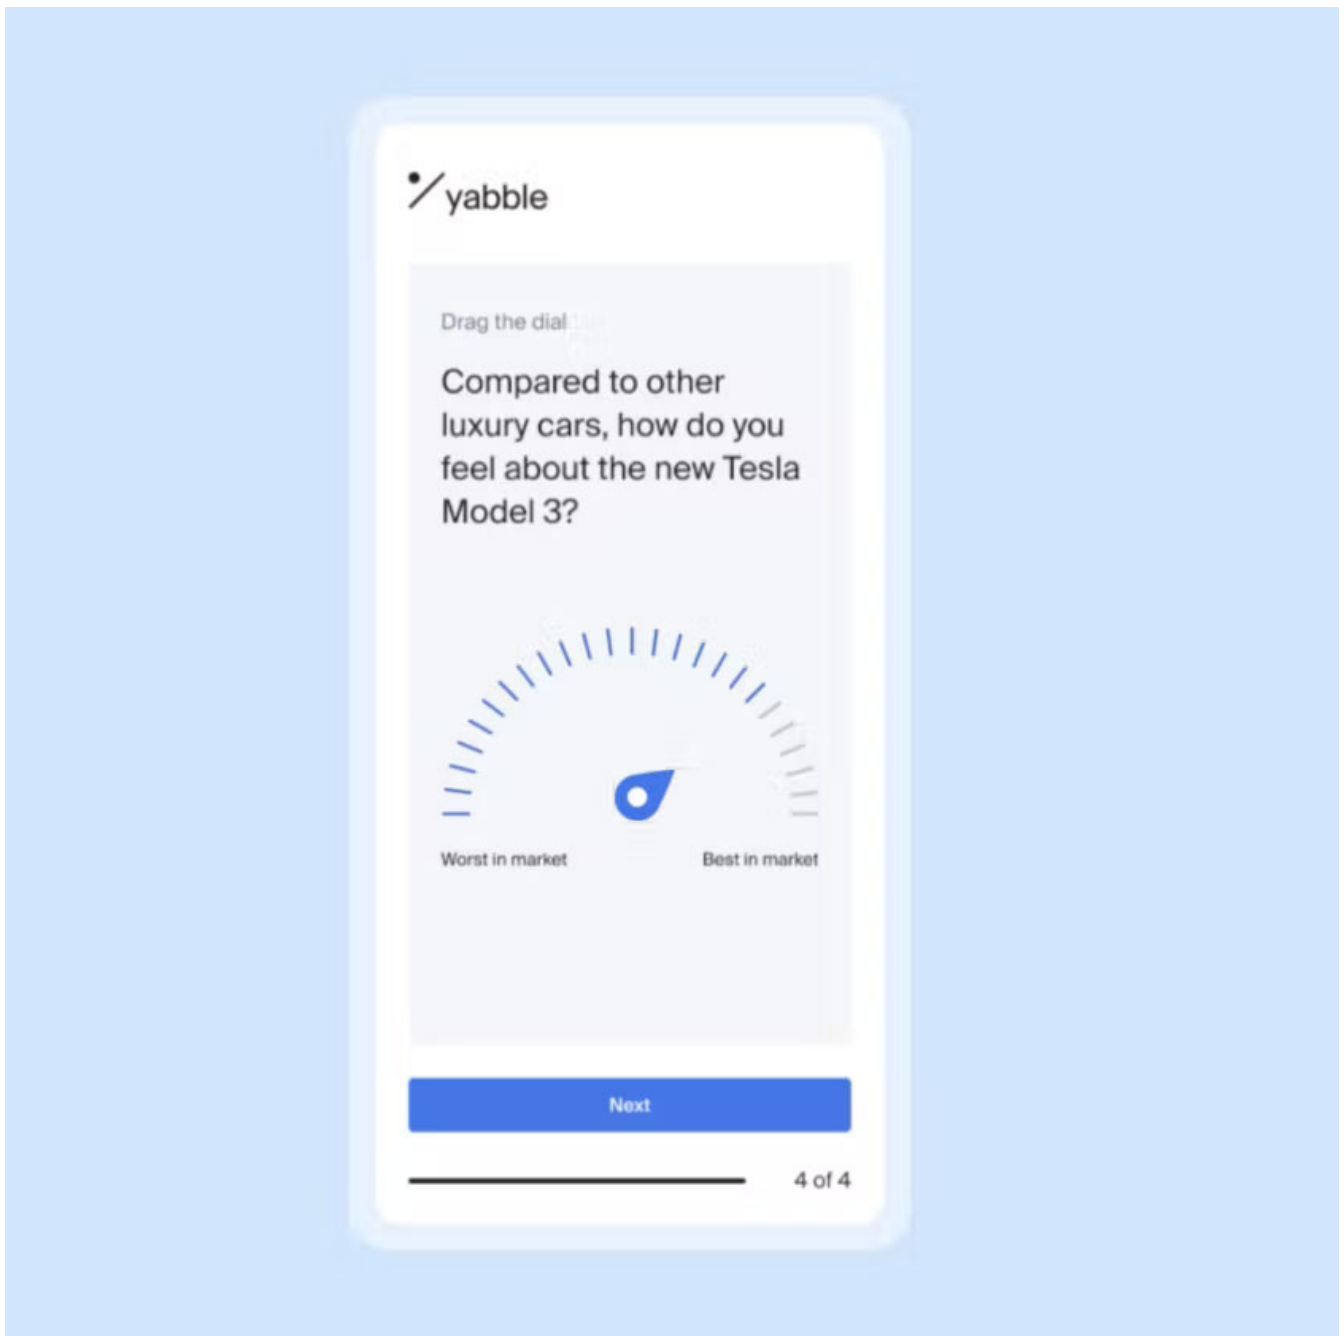

we help developers use best practices and provide tools such as tree content filtering, end-user monitoring to prevent misuse, and specialized endpoints to scope API usage.

Built with OpenAI

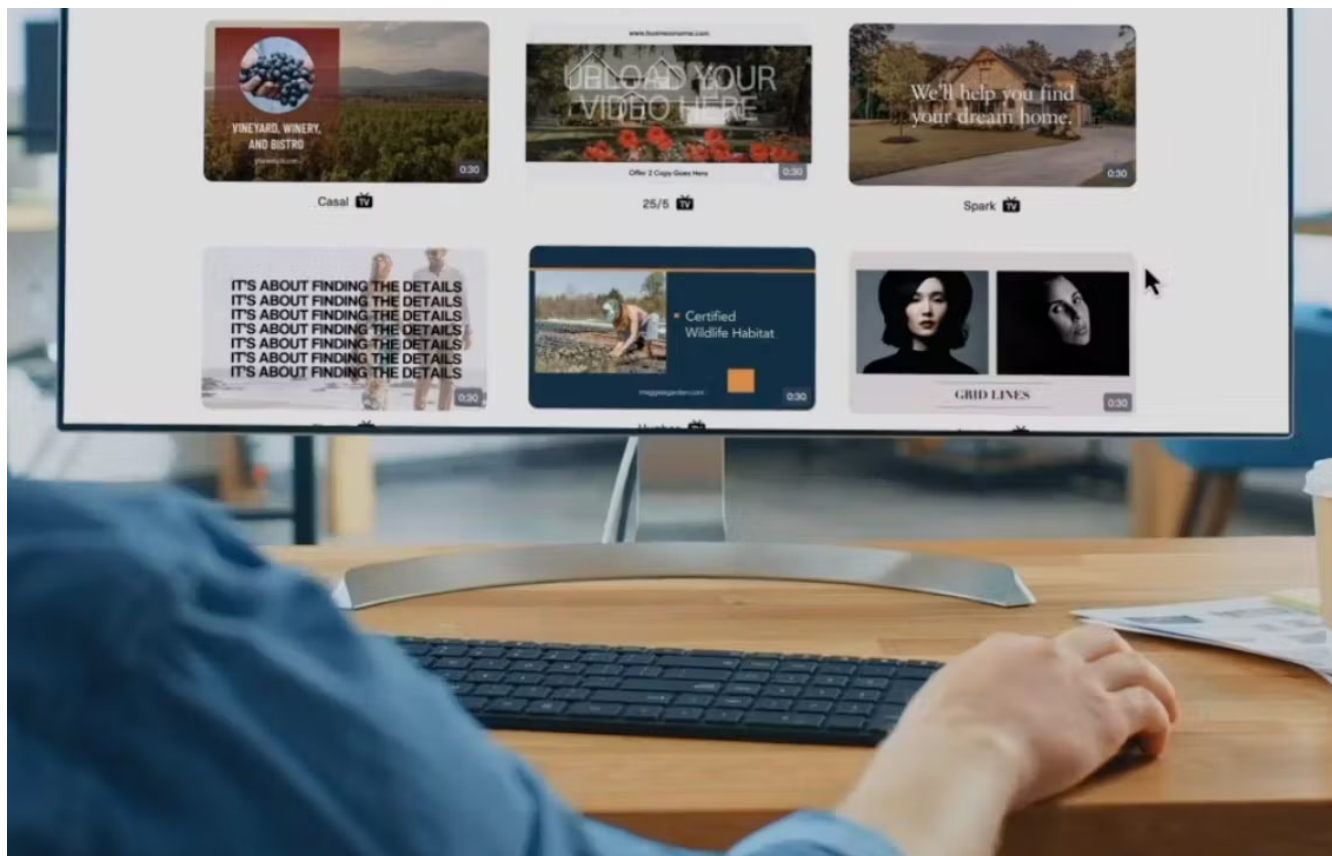

Explore how our diverse network of customers is using our technology to advance their goals.

Yabble

Yabble uses GPT-3 to deliver fast, nuanced insights from customer feedback.

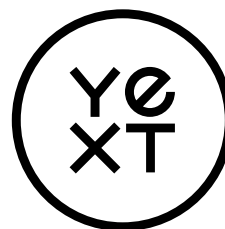

Waymark

Waymark is fine tuning GPT-3 to power and scale done-for-you video creation.

WIX

Deloitte.

Start creating with OpenAI's powerful models.
